## The crystal ball

- Lots of unusable data
  - Lack of compatibility
  - Lack of documentation
- More efficiency and focus needed
  - Data generation
  - Data analysis
  - Data products

Symbiosis

## "Begin with the end in mind"

- Find a problem that needs solving
- Find the tools, data and methods that will help you figure it out
- Create a diverse team (in skills, talent and background)
- Work as a team to develop a product that solves it
- Use evidence-based best practices to convince the market that your've solved it
