

What is ML?

- ✦ Algorithms that are mainly meant for prediction
 - ✦ Supervised learning
- ✦ They cannot often express why the predictions happen
 - ✦ What factors influenced the prediction in what way?
 - ✦ It's a function of the complexity of the model and our inability to express or comprehend that complexity easily
- ✦ Increasing research, emphasis on “explainable AI” or XAI
 - ✦ LIME, SHAP, others
 - ✦ Intrinsically explainable models (Microsoft)

ML and Big Data
