

My personal experience

- ✧ You've got data
- ✧ I need data and a question
- ✧ 80% of my time will be to help you figure out the question
- ✧ 80% of the remaining time will be spent getting your data into a usable state for your question

Need to find the right Big Data
for your question

Need to see if your question is
answerable given available data

My personal experience

- ✦ You've got data
- ✦ I need data and a question
- ✦ 80% of my time will be to help you figure out the question
- ✦ 80% of the remaining time will be spent getting your data into a usable state for your question

Need to find the right Big Data
for your question

Need to see if your question is
answerable given available data

Biases and ethics

- ✧ Our learning is only as good as the training data that is used
- ✧ Training data is often biased
 - ✧ Funding biases
 - ✧ Historical biases
 - ✧ Incompatibilities
