

Machine learning success stories

- ✧ Breast cancer therapeutics
 - ✧ Bioinformatics used to understand innate differences in different types of BrCa, leading to very successful targeted therapeutics
 - ✧ Tamoxifen, Herceptin, Fluoracil, Paclitaxel

Machine learning success stories

- ✦ Identification of subgroups in various diseases, leading to more targeted interventions
 - ✦ EGFR & Lung Cancer
 - ✦ APoE & Alzheimer's prevention
 - ✦ BRCA & Breast cancer prophylaxis
 - ✦ Immunotherapies
 - ✦ Biomarker generation for non-invasive assessments (ctDNA and other assays)
 - ✦ Gene editing (CRISP-R)
