

AI in Biotech

- ✦ Prosthetics/exoskeletons and predictive movement
- ✦ Environmental assessment and closed-loop therapeutic deployment
- ✦ Performance optimization through sensing, adaptation and intelligent coaching
- ✦ Precision medicine
 - ✦ Identifying therapies better targeted at the individual

Are we there yet?

- ✧ Not really
 - ✧ Self-driving cars and planes on auto-pilot
 - ✧ Experimental situations
 - ✧ Some medical decision support
